# THE STEM SCHOOL™

**PROSPECTUS 2024-25**

**QASIMABAD CAMPUS**

**MARHABA CAMPUS**

**SKY TOWN CAMPUS**

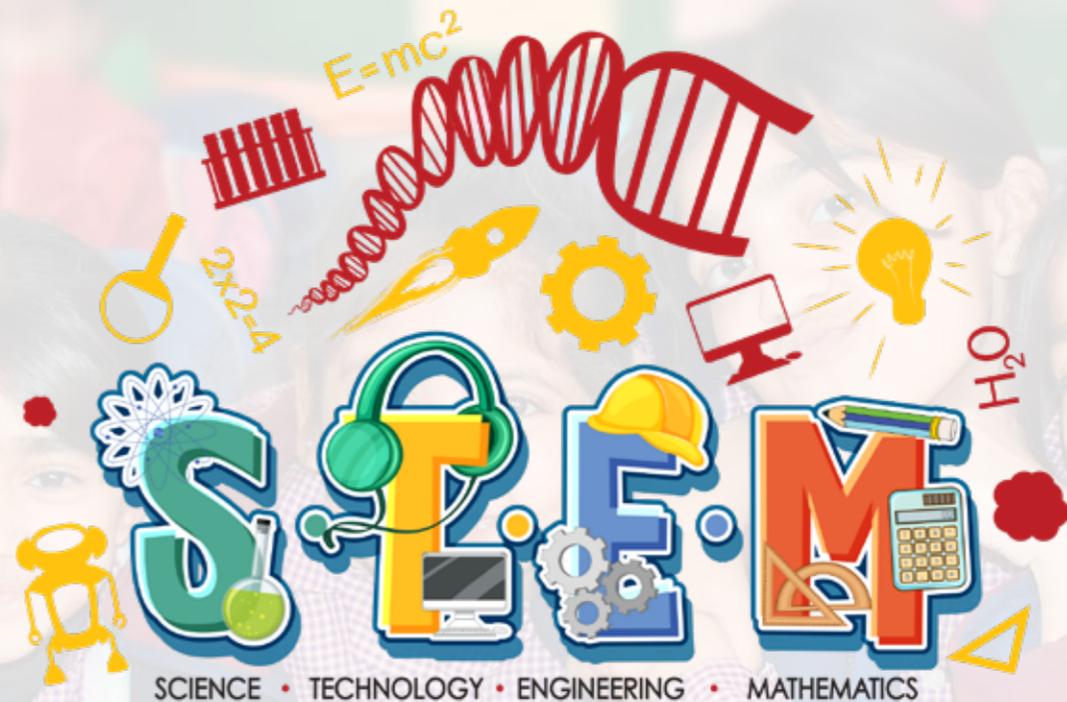

## Welcome To TSS

Pakistan's **first** school incorporating a **laser focus** on STEM - **Science, Technology, Engineering & Mathematics**. Our aim at TSS is to prepare our students to **satisfy** the needs of the **future**. At TSS, we don't just consider the school a place of instruction but as a **preparation for life!**

We congratulate your child on becoming a part of the TSS fraternity and the experience of an exclusive education at par with **International standards**. This Prospectus will help you learn more about our school and our approach towards **teaching and learning**.

## STEM Education & why is it important?

Students are the **leaders** of tomorrow. Allowing them the access to **STEM education** can change not only their prospects for better **job opportunities** but also the **future of Pakistan!** At TSS, Our aim is to provide an education which cannot only uplift the person but also the communities where they are **financially** able to **support** their **families** and create a cycle of upward employment which can

lead to a more **prosperous future.** Our students need to **experience** Engineering and Technology if they are going to succeed in **21st century world** - a world that increasingly depends on these disciplines. Our traditional curricula do not allow them the **creativity** that the **modern world** requires, a **problem-solving skill** as a basis for all problems.

## Our Program

Our programme begins from August and ends in May. We prepare our students for the **National Matriculation Exams**. In their **Primary Years**, the emphasis is on teaching them not only mastery of **academic knowledge** but also skills

that will take them through their life, ensuring **economic success**. We have developed our own books which are integrated with **STEM activities**. These books are completely aligned with the **Single National Curriculum (SNC)**.
